SUMMARY:

Self taught Full-Stack developer with expertise in the MERN stack, curious to learn more about developing scalable distributed systems, loves problem solving and cares about writing readable as well as maintainable code.

TECHNICAL SKILLS:

- **Backend:** Node.js, Express.js, MongoDB, PostgreSQL, Redis, REST APIs, JWT Authentication, Multer, Winston, Razorpay, Strip, OAuth 2.0, Joi, Nodemailer, Twilio, Socket.io, Cloudinary, Firebase, Appwrite
- **Frontend:** React.js, Redux, Formik, Tailwind, React Query, HTML, CSS, Bootstrap, Shadcn/ui, Materialise, Daisyui, Socket.io, Yup, Figma
- **DevOps:** Git, Docker
- **Languages:** Typescript, Javascript

PROJECTS:

ChatFlux - Real-Time Messaging, Audio, and Video Calling Application

- Enabled instant text, audio, video and other file sharing using **socket.io**.
- Integrated functionality to record and send audio and video messages seamlessly using **react-audio-voice-recorder**, **react-webcam** and **socket.io**.
- Implemented peer-to-peer audio and video calling using **WebRTC**.
- Features for replying, deleting, and managing messages in one-on-one and group chats.
- Developed group chat functionality, allowing users to create and manage conversations in real time.
- Secured the app with **JWT** based authentication, Email OTP verification using **nodemailer**, and **OAuth 2.0** integration using Google and GitHub (via **Passport.js**).
- Used **Redis** for session management.
- This project is Containerized with **Docker**.

- **Tech Stack:** TypeScript, Node.js, Express.js, MongoDB, Redis, React.js, Redux, Socket.io, WebRTC, DaisyUI, Tailwind CSS, Passport.js, JWT, Winston, Cloudinary, MediaRecorder API, Joi, Yup, Nodemailer etc.

Tours And Travels - Application for Seamless Tour Management and Booking

- Implemented secure user authentication using **JWT** for login, signup, and session management, ensuring data protection and user privacy.
- Integrated **Razorpay** for secure payment processing during tour bookings, allowing users to easily pay for services within the app.
- Designed and implemented a modern, responsive user interface that enhances user experience across devices, including mobile view.
- Developed a dedicated admin interface for adding, editing, and deleting tours, as well as viewing booking statuses. Also allowed the admin to add and remove sub-admins for effective management of the application.

- **Tech Stack:** Node.js, Express.js, MongoDB, React.js, Axios, Razorpay, JWT

SneakEase – E-Commerce Shoe Website (Ongoing Project)

- Leading the development of SneakEase, an e-commerce platform focused on shoe sales.
- Designed an intuitive and engaging frontend using Figma, prioritizing dynamic navigation and user experience.
- Developing versatile authentication features, including login and signup options with support for various methods such as Google, Facebook, GitHub, mobile number/OTP, and email.
- The rest of the project is currently in development.

EDUCATION:

- **Excel Public School** | Higher Secondary | 2021 - 2023
- **Jawahar Navodaya Vidyalaya** | High School | 2016 - 2021
